DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/26/08 has been entered.
2. This is a response to the amendment, filed 3/26/08.
3. Claims 1-16,39-41,45-51 are pending.

Response to Amendment/Arguments

4. In response to the amendment to the claims, the previous rejection to claims 1-16,39,40,47-49,51, under 35 USC 112, second paragraph, is withdrawn.
5. Applicant's arguments, see pages 13-15, filed 3/26/08, with respect to claims 1-16,39,40,51 have been fully considered and are persuasive. The rejection of these claims has been withdrawn. After further consideration, the Examiner concludes that the prior art of record does not further teach the combination of selecting a parity subtraction method or a recalculation method for parity calculation based on the method that results in a fewest number of read operations to compute parity.
6. Applicant has neither amended nor address the previous rejection to claim 41. The current claim 41 is still rejected for the same reasons indicated previously.

Claim Rejections - 35 USC § 102

Art Unit: 2187

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

8. Claim 41 is rejected under 35 U.S.C. 102(e) as being anticipated by Corbett (US 6,993,701).

As to claim 41:

9. Corbett teaches a method for managing storage of data in storage blocks, the method comprising the steps of: generating block layout information (forming stripes; 8/35-52); dynamically determining a first number of error correction calculations (calculate parity; 9/20-25; 6/30-35; 12/53-60); dynamically determining a second number corresponding to a chain length and in response to the block layout information, controlling the execution of an I/O operation by identifying storage blocks for use by the I/O operation so as to have a chain length of the second number within a storage device while performing the first number of calculations of error correction parameters across a stripe (forming/gathering blocks to be written in stripe to minimize parity calculation; 5/50-67).

. Allowable Subject Matter

10. Claims 1-16,39,40,45-51 are allowed.

11. Claims 45-50 are allowed for reasons indicated in the previous office action.

12. Claims 1-16,39,40,51 are allowed for reasons indicated above.
